Installation

For safety reasons, it is advisable to secure louver with rope before installing so it does not fall to ground if mishandled.

1. Remove template (with Magic-Pak logo) from wall sleeve, if applicable. Template should have been installed with the wall sleeve kit.
2. Attach gasket (supplied) to the inside surface of the V-shaped (dividing) louver (see Figure 1). When the louver is installed, this gasket will create a seal between the V-shaped louver and the divider panel of the wall sleeve.
2. Install bottom two screws into louver, position the screws into the bottom key holes of wall sleeve, and tighten into place. Install the other four screws into the louver and tighten.

Louver and Wall Sleeve
